Earl,

Hope this helps. This is all I can tell you at this time.

Thanks,

Phil Allen

Please respond to <bobp@ProjectNavigator.com>	RE: USACE review of sediment modeling for the Patrick Bayou Superfund site	

Yes we do anticipate that the draft report will be provided to EPA within the next quarter.

Bob,

Can you answer this question???

Thanks,

Phil Allen

Phil,

I am trying to budget out my time for the next three months. Do you  
anticipating receiving the sediment transport modeling report from QEA  
sometime in the next three months?

Thanks,

Earl

USACE review of sediment modeling  
for the Patrick Bayou Superfund  
site

Steve,

I am the RPM for the subject site; and Dr. Hayter of the USACE has  
informed me that there is a "master" IAG set up for help on sediment sites.  
I need Dr. Hayter to review a some sediment transport modeling work perfomed  
by QEA, for the Patrick Bayou Superfund site located in  
Deer Park, Texas. Dr. Hayter anticipates this review to take about one  
week. Can you please help me provide funds for this effort, as I am having a  
little trouble getting an IAG directly for Region 6?

Thanks in advance for your help,

Phil Allen
